

PRODUCT SPECIFICATIONS

TESH™

SERIES CONSTANT WATT HEATING CABLE

APPLICATION

TESH series resistance constant Watt heating cables are used where circuit lengths exceed the limitations of parallel resistance heating cables. TESH withstands the temperature exposures associated with steam purging.

The series circuitry of TESH provides consistent Watt-per-metre power output along the entire length of the cable with no voltage drop. A glassceramic tape layer adds additional protection to the heating cable and a fluoropolymer overjacket provides chemical resistance while maintaining maximum flexibility. The construction of the cable meets the 7 Joule impact test per EN50019.

TESH cables are approved for use in ordinary (nonclassified) areas and Catagories 2 and 3 ATEX classified areas.

RATINGS

Maximum watt density25 W/m

Maximum supply voltage 750 Vac

Maximum continuous exposure temperature

Power-off260°C

Minimum installation temperature.....-60°C

Minimum bend radius 5 x cable O.D.

T-rating ¹ T2 to T6
(using the principles of stabilized design or limiters)²

Notes

1. T-rating per internationally recognised testing agency guidelines.
2. Thermon heating cables are approved for the listed T-ratings using the stabilised design method. This enables the cable to operate in hazardous areas without limiting thermostats. The T-rating may be determined using CompuTrace® Electric Heat Tracing Design Software or contact Thermon for design assistance.

CERTIFICATIONS/APPROVALS

ISSeP 10ATEX 015X
II 2 G / Ex e IIC T2 to T6 Gb
II 2 D / Ex tb IIIC IP6X T260°C to T80°C Db

TESH has additional hazardous area approvals including:

- GGTN • Kazakhstan • TR CU • Gospromnadzor • CQST
- FSETAN • RS • TCCEEE

Contact Thermon for additional approvals and specific information.

CONSTRUCTION

- 1 Heating conductor
- 2 Fluoropolymer dielectric insulation
- 3 Glassceramic tape
- 4 Nickel-plated copper braid (BN)
- 5 Fluoropolymer overjacket

PRODUCT FEATURES

- Withstands continuous flammability testing according to IEC 60332-1: 1993
- Allows cable to be installed at temperatures to -60°C

STABILISED DESIGN

The Watt density limitation for TESH cables is directly related to the desired maintain temperature. Thermon is able to ensure the T-rating based on a stabilised design that enables series constant Watt heating cables to operate in hazardous areas without limiting thermostats. TESH cable output and T-rating are dependent upon supply voltage, cable resistance, temperature conditions as well as additional variables. Contact Thermon for design assistance.

BASIC ACCESSORIES

Thermon offers system accessories designed specifically for rapid, trouble-free installation of Thermon heating cables.

All cables require a connection kit to comply with approval requirements. Information on accessories to complete a heater circuit installation can be found in the "Heating Cable Systems Accessories" product specification sheet (Form TEP0010U).

Note

1. Longer circuit lengths are possible based on earth-fault protection with higher earth-fault ratings; contact Thermon.

CIRCUIT BREAKER SIZING AND TYPE

Maximum circuit lengths for various circuit breaker amperages are shown below. Circuit breaker sizing and earth-fault protection should be based on applicable local codes. For information on design and performance on other voltages, contact Thermon.

Earth-fault protection of equipment should be provided for each branch circuit supplying electric heating equipment.
